Mara

is a modern flat weave with a uniform weave structure. The piece dyeing process gives Mara its different colour nuances, which result in the slightly washed-out overall impression. The material is made of hard-wearing polyester and has an enormous abrasion resistance with over 100,000 abrasion cycles. Pilling and light fastness are also in the upper range at 4-5. Together with the dirt and moisture repellent finish, Mara is equipped for all the demands of everyday life and is suitable for all upholstered furniture. Mara is washable up to 30 degrees. We recommend dry cleaning as the covers are easier to re-upholster due to the reduced shrinkage.

Category C

100 % PL

Abrasion cycles: 100.000

Light resistance: 4 to 5

Pilling information: 4 to 5
